Demolition/Renovation Permit Issuance Checklist/Questionnaire (Health and Safety Code 19827.5)

Use of this checklist is to determine whether an application for a Demolition/Renovation Permit requires a *Notification of Demolition/Renovation* form from the Mojave Desert Air Quality Management District (MDAQMD) prior to permit issuance. If this form is NOT required, then the applicant and permitting agency with the provisions of Health & Safety Code 19827.5 should retain this form with the permit application to verify compliance.

Will the demolition or renovation permit applied for involve one of the following:

1. Yes No Any renovation work that involves the removal or disturbing of any material containing more than 1 percent Asbestos and at least 260 linear feet on pipes or at least 160 square feet on other facility components, or

2. Yes No A complete building demolition, or a partial demolition which includes structural load bearing members (wall or structural members), including ***demolition of buildings which do not contain asbestos***. Residential buildings having four or fewer dwelling units are exempt. All demolitions by intentional burning are regulated under the NESHAPS.

NOTE: If yes is marked for numbers one or two, the applicant MUST submit a copy of the MDAQMD Notification of Demolition/Renovation form PRIOR to the issuance of a demolition permit.

I declare that the notification requirements listed above are not applicable to this project and that this work does not require compliance with the provisions of California Health and Safety Code 19827.5, and Part 61 of Title 40 of the Code of Federal Regulations or any successor regulations. I certify under penalty of perjury under the laws of the State of California that all the foregoing is true and correct.

Signature of Owner or Contractor

Date

Typed or printed name of Owner or Contractor

Job Address

NOTE: Asbestos of any amount or type is not allowed in the landfills in San Bernardino County.
